

Dane County Planning & Development Zoning Division

FIRE NUMBER SIGN PLACEMENT INFORMATION

DCCO 76.07(1)(a):

The sign shall be installed so that the numbers are **perpendicular** to the roadway and the post shall be located not more than 10 feet from the right of way of the road and not more than 10 feet from the driveway serving the building. The sign shall be installed to be not less than 3 ½ feet nor more than 4 ½ feet from ground level and shall not be concealed from view of the road.

DIGGERS HOTLINE

**ALWAYS CALL
BEFORE YOU DIG**

Diggers Hotline: Wisconsin's One-Call Center

CALL 811 or (800) 242-8511
(262) 432-7910
(877) 500-8592 (emergency only)

DIGGERS HOTLINE

WWW.DIGGERSHOTLINE.COM

It's The Law. Wisconsin Statute 182.0175 requires all excavators — including homeowners and construction contractors — to call Diggers Hotline at least three working days before starting the work.

Plan ahead! Give Diggers Hotline a call at least three working days prior to the start date of your excavation. The call center is open 24 hours a day and 365 days a year, but the busiest times are Monday and Tuesday mornings.

NOTE: Compliance with the above listed instructions is very important with regard to emergency services. Ambulances, fire trucks, and other emergency response vehicles travel at high speeds and look for your address by using the green "fire number" sign with your address numbers printed on it. These numbers are assigned on a grid system, and when they are incorrectly installed or out of sequence, they severely hamper the ability for quick response of our emergency workers. Any extra time spent looking for an address is crucial time lost. In addition, your address affects other neighbors' safety and well being for the same reasons. **Failure to install a number as specified could delay effective service.**

OWNERS RESPONSIBILITY

Section 76.10(3) Dane County Code of Ordinances provides that the owner of the land on which a numbering sign is located shall be responsible for the installation and maintenance of the number as specified by the ordinance.

Post must be located in the shaded area either side of the driveway:

Rural Address Assignment / Supplies Request Form

What is rural addressing?

The Dane County Department of Planning and Development is responsible for assigning and issuing addresses for properties located in the county's 33 unincorporated towns. Property owners seeking assignment of a rural address for new or existing parcels should complete this form. Proper rural numbering is essential for local delivery of USPS mail, private delivery services, utility providers, and emergency services. Fire, EMS, and Police responders and utility companies rely heavily on the accuracy and predictability of rural addresses.

How are rural addresses assigned?

Dane County uses a grid system to assign addresses, with the grid starting at zero, south to north, and also east to west, at the southeastern corner of the county. As addresses are charted from the zero starting point, numbers increase south to north, and east to west. The grid runs in 20 foot intervals, with each increment of this distance resulting in assignment of the next number. For meandering roads that do not fit neatly to the imaginary grid, the entire length of the road is charted as either north-south, or east-west, with addresses assigned accordingly. In some instances, addresses are charted on a case-by-case basis.

To properly chart a new address, several factors are considered. These factors include: existing addresses, provided they are properly charted; the existing grid numbers from county maps; the exact location of the driveway intersection with the named road; and existing addresses using the same driveway. As noted above, a site plan, drawn to scale, including lot lines and lot dimensions, and any approved Driveway Permit information from the Town, is essential. In subdivisions, previously assigned addresses in adjacent plats must also be considered. There are numerous duplicate road names, including some in the same general geographical area, so care must be taken to avoid confusing number duplication. All of the above factors are part of the necessary steps to properly assign rural addresses.

More information about rural addressing can be found in Chapter 76 of the Dane County Code of Ordinances, available on the Dane County website, at www.CountyofDane.com.

Please allow 1-3 weeks to process your request. A nominal fee may be assessed for the address assignment in accordance with sec. 12.05(16), Dane County Code of Ordinances.

Information Required for Rural Address Assignment

- Site plan, *drawn to a measurable scale* showing:
 - Lot lines & dimensions
 - Any existing or proposed ingress/egress to the property
 - Distance from lot lines to the existing / proposed ingress
 - Any approved Driveway Permit information from the town or county.

Specific Location / Rural Address Request

(Entire form must be filled out before staff can process the request)

Property Owner: _____ Date: _____

Email Address (assignment will be provided electronically):

Township / Section of Needed Address:

Tax Parcel Number: _____ - _____ - _____

Specific Area / Nearby Roads
(e.g., road names, distance to intersection, etc.):

Additional Information: _____

IMPORTANT

Applicants must provide a **site plan**, drawn to a measurable scale showing:

- Lot lines & dimensions
- Any existing or proposed ingress/egress to the property
- Distance from lot lines to the existing / proposed ingress
- Any approved Driveway Permit information from the town or county

Applications that are not within a platted subdivision or certified survey map lot require approval from the municipal zoning or building permit authority. Please complete the information below or provide separate approval.
