Project: 3678-00-00
County Road MN
County Road AB – County Road N
Door Creek Bridge, B-13-0915
Dane County

Subject: Local Officials and Public Involvement Meeting (LOM/PIM)

Location: Town of Pleasant Springs Town Hall
2354 County Road N
Stoughton, WI 53589

Date: Tuesday, January 30th

Time: 6:00 PM – 7:00 PM

We are seeking your input for the proposed bridge replacement project on County Road MN over Door Creek in the Town of Pleasant Springs. You can provide any comments or concerns regarding the project by filling out and returning the enclosed comment form, attending the Local Officials and Public Involvement Meeting in person, or contacting either of the project contacts listed on the next page. The Local Officials and Public Involvement meeting will be an open house style meeting and you are encouraged to attend and ask questions and express any concerns.

PROJECT BACKGROUND, PURPOSE, AND NEED

The existing bridge was constructed in 1921 and rehabilitated in 1958. The bridge is structurally deficient and functionally obsolete. The open steel girders have significant section loss. The reinforced concrete abutment has large cracking under the exterior girders. Dane County has recently repaired part of the abutment, but it is a temporary fix. The deck and superstructure have a National Bridge Inventory (NBI) rating of 4, indicating a poor condition, and the substructure has an NBI rating of 3, indicating serious condition. The existing guardrails have turned down ends and are not to current standards of crashworthiness.

PROPOSED IMPROVEMENTS

The project proposes to replace the existing bridge with a new single span concrete span bridge. Additional incidental work includes installing new concrete approach slabs and limited pavement replacement approaching the structure, installing new pavement markings, removing and replacing the existing guardrail, riprap placement to prevent erosion along the abutments and wingwalls, reconstructing the existing driveway on the southwest corner of the structure, and installing a short radius guardrail terminal.

TRAFFIC CONTROL

The roadway will be closed during construction and traffic will follow a posted detour (see included detour route overview)

REAL ESTATE

Minor proposed right of way (FEE) and temporary limited easements (TLE) may be required to accommodate temporary grading, reconstructing the driveway, and installation of guardrail.

ENVIRONMENTAL

Minor wetland impacts will occur on all four sides of the structure. Necessary permits will be completed for the project.

PROJECT SCHEDULE

Environmental Document	February 2024
Design Study Report	February 2024
Final Road Plans	March 1, 2024
Final Plans Specification and Estimates	May 1, 2024
Bid Letting	September 10, 2024
Construction	2025

QUESTIONS, COMMENTS, OR CONCERNS

If you have questions, comments, or concerns, please contact one of the representatives shown below, attend the in-person LOM/PIM, or fill out and return the comment form by February 9, 2024.

Sincerely,

Pam Dunphy
